ENVIRONMENTAL PROGRAMS

It is the policy of the Placentia-Yorba Linda Unified School District that programs which increase the awareness of environmental concerns should be developed and implemented for both educational application and districtwide conservation efforts. This commitment to sound environmental practices will promote a student, staff, and community awareness of critical environmental issues.

The Board supports districtwide activities that encourage students and employees to recycle, conserve water and energy, use biodegradable materials when possible, and dispose of waste in an environmentally sound way.

Policy adopted: 1/29/91
